

JASON DUQUENNE

Fullstack Developer · JavaScript
34 years old · Bailleul

■ AVAILABLE FOR WORK

A rigorous developer, driven by the desire to be useful. I build tools that fade into the background through sheer efficiency.

// LICENCE

Driving licence B

// EXPERIENCE

■ **Fullstack Developer** @ Independent — 2024 – Present · 2 years

Web products designed and shipped independently, end to end. Artemis FoodLab — a local-first meal planner, fully in-browser on IndexedDB, no backend. Dofus Retro Craft Dashboard — a static-first utility hub: XP and craft calculators, interactive map and profitability guides, all client-side. AI integrated into the workflow (Claude Code, Gemini) for brainstorming and speed, architecture and review kept in hand.

TYPESCRIPT · REACT · NEXT.JS · THREE.JS · WEBGL · TAILWIND CSS · INDEXEDDB · CLAUDE CODE

■ **Fullstack Developer** @ Dagoma — 2022 – 2024 · 2 years

Continued to build out the 3D printer farm dashboard and support its API. Embedded control screen for Dagoma's professional printers (Pro430, SigmaPro): a React interface under Electron, running on Raspbian on top of OctoPrint. Custom OctoPrint plugin in Python to bridge the machine with Dagoma's API and app, plus contributions to the Marlin firmware (C++).

TYPESCRIPT · REACT · ELECTRON · NODE.JS · EXPRESS · MONGODB · PYTHON · C++ · OCTOPRINT · RASPBERRY PI

■ **Frontend Developer · Work-study** @ Dagoma — 2021 – 2022 · 1 year

Led the frontend build of the 3D printer farm management dashboard — fully in React — with strong involvement in the Node.js / Express API.

TYPESCRIPT · REACT · NODE.JS · EXPRESS · MONGODB

■ **Application Developer · Work-study** @ Codecare — 2020 – 2021 · 1 year

Built hospital medication inventory applications: stock tracking, withdrawals handled by nursing staff, prescription creation and Kanban-based restocking. Dashboard in Vue.js and Quasar, C# / .NET backend.

VUE.JS · QUASAR · TYPESCRIPT · C# · .NET

// EDUCATION

Frontend Developer — work-study · OpenClassrooms		2020 – 2022
Fullstack Developer · Dawan		2019
3D Designer / Artist · Pôle 3D		2012 – 2014
Baccalauréat STI — Mechanical Engineering		2012
